

◆ I want to increase productivity!

I want to be able to run two different products with different material thicknesses at the same time!

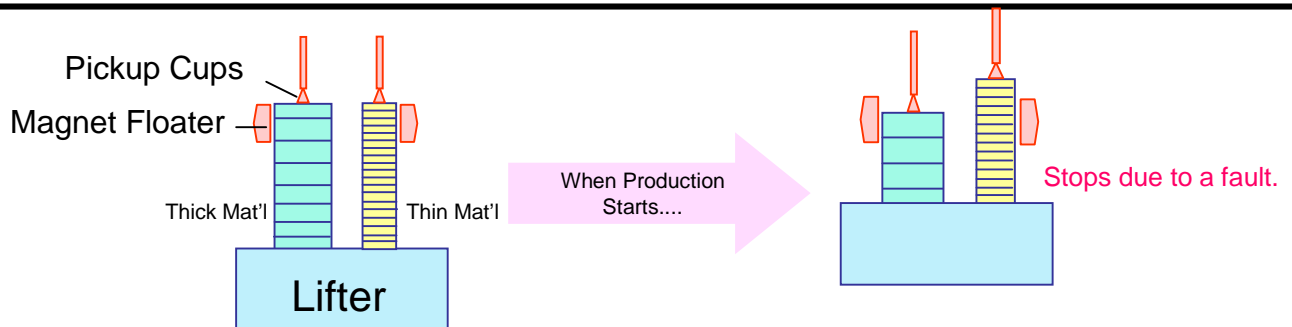

Enabled the dual transfer of blanks with different thicknesses on a transfer line!

Using an
ACCESS
Destack Feeder

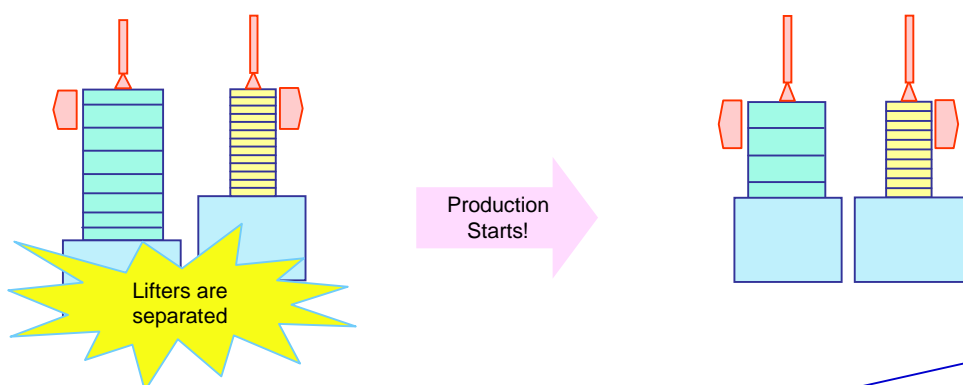

■ Customer's Application: Auto Parts

【Before】

■ Situation Before Consulting with ACCESS, Ltd.: Products with different thicknesses could not be conveyed because the height of the top of the blanks was not uniform.

【Countermeasure】 The destack feeder lifters were separated and independently controlled to achieve dual conveyance.

【After】

Enabled the simultaneous forming of different products with different thicknesses.

Please contact
ACCESS for details.
